

Empower Sleep Information Sheet

How do dentists connect with Empower Sleep?

They can go to empowersleep.com/providers to become a new provider, and we will reach out to them, or email care@empowersleep.com.

What are the benefits of connecting with Empower Sleep?

- 1 We provide end-to-end sleep as a solution and go beyond just interpreting a report. We are a virtual doctors office, not a virtual sleep test interpreting service. If the dentist is looking for someone to just sign off on the report, we are not a good fit. If the dentist is looking for a sleep doctor they can refer the patients to for consultations, get sleep tests interpreted, collaborate on patient data, as well as get Rx's for OAT/CPAP, we can provide those services.
- 2 We don't charge the dentist for anything. Our financial relationship is with the patient.

Empower Sleep is a digital sleep clinic in your dental practice. As a dentist, you play an important role in identifying sleep-related breathing disorders. We're empowering you to provide accessible, personalized, and affordable sleep care for your patients.

Through direct communication channels and continuous care, we help to streamline the information flow with the patient, creating efficient and collaborative care.

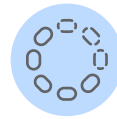

What solutions do we provide?

Home sleep test interpretations

Dentist-physician consultations

Rx's for appliances and more

What is the process of getting support beyond the initial onboarding call?

Upon completion of the onboarding process, you will gain access to the Provider Portal. Here, you will be able to refer patients, request Rx's for appliances, and more.
